

Glow in the Dark Cubes

Supplies:

- Wooden block
- Black marker
- Scissors (not included in kit)
- Glow in the dark tape
- Constellation booklet

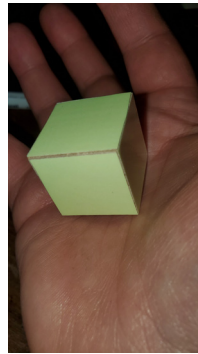

Instructions:

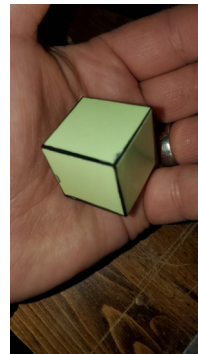

1. Cut the glow in the dark tape to cover each side of the wooden block. Trim the edges of the tape to fit (ask an adult if you are having trouble with this)

2. Peel off the protective layer of the tape and stick each piece onto the cube, covering each side.

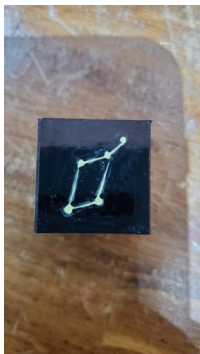

3. Outline the edges of the cube with the black marker.

4. Lightly outline a constellation you would like to use on one side of the cube using the marker. Refer to the constellation booklet.

5. Colour the outside of the constellations, using the black marker, leaving the lines and the stars visible and everything else coloured black.

6. Let it dry for a few minutes so the marker doesn't smear.

7. Repeat on the other 5 sides, choosing different constellations for each one.

8. Charge your cube in the sun or under a light bulb, put in a dark space, and enjoy!
